

## Research Experience

Rachel N. Slaybaugh

November 16, 2017

### University of California, Berkeley

*Assistant Professor of Nuclear Engineering*

Jan. 2014 - Present

*Berkeley, CA*

- Researching numerical methods for neutral particle transport with an emphasis on supercomputing and advanced architectures
- Specialization in deterministic, Monte Carlo, and Hybrid methods
- Applications in reactor design, shielding, and nuclear security and nonproliferation
- Design Emphasis in Computational Science and Engineering Affiliated Faculty member
- Applied Science & Technology Faculty member

### Advanced Research Projects Agency – Energy

*Program Director*

Oct. 2017 – present

*Washington, DC*

- Director for Modeling-Enhanced Innovations Trailblazing Nuclear Energy Reinvigoration Program
- Special Government Employee Jan.–Oct, 2017
- Program creation and management

### Bettis Laboratory

*Senior Engineer in the Shield Design and Development group*

Mar. 2012 - Aug. 2014

*West Mifflin, PA*

- Implemented the Forward-Weighted Consistent Adjoint Driven Importance Sampling (FW-CADIS) method for variance reduction in Monte Carlo; accredited method for use in shield design
- Developed new Resonance Factor variance reduction method for streaming through materials with space and energy self-shielding
- Built two software tools in support of using FW-CADIS for shield design
- Scientific Software Development Committee: leader in developing internal website for sharing software carpentry tools and resources

### University of Wisconsin–Madison

*Research Assistant / Rickover Fellow*

Sept. 2006 - Nov. 2011

*Madison, WI*

- Researched “Acceleration Methods for Massively Parallel Deterministic Transport”: added parallelization in the energy domain, an advanced eigenvalue solver, and a new multigrid in energy preconditioner to Denovo, developed at Oak Ridge National Lab
- Developed two Monte Carlo source sampling methods for arbitrarily shaped plasma sources; the sources are generated directly from plasma physics data

### Forschungszentrum Karlsruhe (KIT)

*Visiting Researcher*

May 2008 - Dec. 2008

*Karlsruhe, Germany*

- Learned about the Rigorous 2 Step method for Monte Carlo geometry conversion while working in the Reactor Safety group
- Helped group incorporate the Direct Accelerated Geometry Monte Carlo (DAGMC) library into MCNP workflow

### Penn State Breazeale Reactor

*Reactor Operator*

Aug. 2003 - Apr. 2006

*University Park, PA*

- NRC licensed Reactor Operator for TRIGA Mark III reactor
- Analyzed core burn-up anomaly; calibrated gamma irradiation facilities
